Using Footnotes & Endnotes with RefWorks Write-n-Cite for Word

Most citation styles use parenthetical in-text citations like (Smith, 2019). However, styles like Chicago and Turabian also use footnotes or endnotes. Refworks does not create the footnote or endnote, and this must be done first using Word’s built-in Reference maker.

1. Open the References tab and insert a footnote.

2. Switch back to the RefWorks tab and now you can insert the citation.
